

**Evaluation Sheet of Guest Professor Program,
Graduate School of Science, Osaka Prefecture University**

The following information will be used as a reference material for our evaluation of the program. We appreciate your kind cooperation. We appreciate your sending this form by e-mail to kiriye@mi.s.osakafu-u.ac.jp. Prof. Kouyemon Iriye, Graduate School of Science, Osaka Prefecture University.

1. If there are comments or advice for the graduate students who took your lecture in “Science Communication”, we appreciate your writing them below.

It will be better to encourage some questions to express their ideas/comments on the teaching materials. I believe even a very simple question is still worth to encourage students to raise their hands and express their idea in English. Taking notes are still one kinds of important training for students.

2. If there are comments or advice for the graduate students of your host professor, we appreciate them.

Students can only tell me their research topics but no more details of their works. It is a little pity because the scientific discussions cannot be continued without more detailed information.

3. If there are comments or advice for the undergraduate students who took your lecture, we appreciate them.

The same as 1.

4. If there are comments and suggestions for our program, we appreciate them.

This is a very good program to encourage students to learn “Science Communication”. However, students may not really understand how to ask and to express their questions or ideas. I would suggest a chat with the speaker about 30 min. after the lecture. This may encourage some students to ask questions and to learn science communication during the chat because some students may not express their ideas in formal lecture time.

5. Can we make this sheet open to the public? [YES]
